

Risk Management Policy

Tamworth Regional Council recognises that Risk Management is the systematic application of management practices for the identification, analysis, control and monitoring of uncertainties that may impact on Council's ability to achieve its objectives.

Tamworth Regional Council will ensure that risks are identified at a corporate and operational level and that these risks are managed and reported on regularly. Risks considered may include those impacting on Council's reputation and its operational, financial, technological, environmental, compliance, product/service quality, human resources and financial reporting performance.

Additionally, Council shall foster a culture of risk management across all its operations. This shall include the use of risk assessments as part of most operational decisions.

As part of its approach to systematically managing risk at the Tamworth Regional Council, the following will be undertaken:

- Establish and maintain Risk Registers of all known risks affecting or likely to affect Council at a Corporate and Business Unit level;
- Record the output of risk assessments; and
- Annually review operational and compliance risks.

All Council staff are responsible for managing risk associated with the activities and functions under their control. Risk management processes should be integrated with normal planning processes and management activities.

Risks must be escalated in accordance with Council's Risk Delegation levels.

Paul Bennett
