Summary

This Development Servicing Plan (DSP) covers sewerage developer charges for the Tamworth Regional Council Local Government Area.

This DSP has been prepared in accordance with the 2016 Developer Charges Guidelines for Water Supply, Sewerage and Stormwater issued by the Minister for Lands and Water, pursuant to section 306 (3) of the *Water Management Act, 2000*.

The area covered by each DSP, and the existing works serving the area, are shown on the plans in Section 12. The timing and expenditure for works serving the area covered by each DSP are shown in Section 4. Levels of service to be provided in each DSP area are summarised in Section 5.

The sewerage developer charges for the areas covered by this DSP document have been determined as follows:

DSP Name	Developer Charge (\$ per ET)	Cross-subsidy: resulting increase in the Typical Residential Bill
Arcadia	\$6,001	2.98%
Barraba	\$500	
Kootingal	\$500	
Manilla	\$500	
Hills Plain	\$4,349	
Hills Plain Pressure Sewer	\$2,003	
Tamworth	\$1,512	

Developer charges relating to this DSP will be reviewed after a period of 4 to 8 years, in accordance with the guidelines. In the period between any review, developer charges will be adjusted annually on the basis of the movements in the CPI for Sydney, excluding the impact of GST.

The developer shall be responsible for the full cost of the design and construction of sewerage reticulation works within subdivisions.

Background information containing all the critical data including calculation models behind each DSP is available on request.

1 Introduction

Section 64 of the *Local Government Act, 1993* enables a local government council to levy developer charges for water supply, sewerage and stormwater. This derives from a cross-reference in that Act to Section 306 of the *Water Management Act 2000*.

A Development Servicing Plan (DSP) details the water supply, sewerage and/or stormwater developer charges to be levied on development areas utilising a water utility's water supply, sewerage and/or stormwater infrastructure.

This DSP covers sewerage developer charges for areas served by Tamworth Regional Council (TRC). A separate DSP has been prepared to cover water supply developer charges.

This DSP has been prepared in accordance with the 2016 Developer Charges Guidelines for Water Supply, Sewerage and Stormwater issued by the Minister for Lands and Water, pursuant to section 306 (3) of the *Water Management Act, 2000*.

This DSP document supersedes any other requirements related to sewerage developer charges for the areas covered by this DSP. This DSP takes precedence over any of Council's code or policies where there are any inconsistencies relating to sewerage developer charges.

2 Administration

2.1 DSP Name and Area Covered

The basis for defining the DSP area boundaries is the existing and future development served by the TRC sewerage schemes. Separate DSPs have been prepared for the towns with separate sewerage schemes, for development areas of over 500 lots and for areas serviced by a low pressure sewerage scheme. A summary of the DSP areas is provided in Table 2-1.

Table 2-1 Summary of DSP Areas

DSP Name	Area Covered
Arcadia	The area covered by this DSP is shown on Plan 4. The basis for defining the DSP boundaries is a development area over 500 lots.
Barraba	The area covered by this DSP is shown on Plan 1. The basis for defining the DSP boundaries is an area serviced by a separate sewerage scheme.
Hills Plain	The area covered by this DSP is shown on Plan 4. The basis for defining the DSP boundaries is a development area over 500 lots.
Hills Plain Pressure Sewer	The area covered by this DSP is shown on Plan 4. The basis for defining the DSP boundaries is an area serviced by a pressure sewerage system.
Kootingal	The area covered by this DSP is shown on Plan 2. The basis for defining the DSP boundaries is an area serviced by a separate sewerage scheme.
Manilla	The area covered by this DSP is shown on Plan 3. The basis for defining the DSP boundaries is an area serviced by a separate sewerage scheme.
Tamworth	The area covered by this DSP is shown on Plan 4. The basis for defining the DSP boundaries is an area serviced by a separate sewerage scheme.

2.2 Payment of Developer Charges

Developer charges will be determined and levied in accordance with the provisions of this DSP document at the time of considering an application for a compliance certificate under Section 305 of the *Water Management Act 2000* or a construction certificate under section 109 of the *Environmental Planning and Assessment Act 1979* or at the time of issuing a notice or other form of written advice, e.g. Under the *SEPP (Exempt and Complying Development Codes) 2008*. The time limit for payment of developer charges will be included in the notice of determination or will be advised to the developer by a separate notice. The amount of any developer charges not paid within the specified time limit will lapse. Any subsequent determination of developer charges will be made in accordance with Council's then current DSP.

2.3 Dispute Resolution

Disputes will be resolved in accordance with Section 2.9 of the Guidelines. TRC is not a member of the Electricity and Water Ombudsman (EWON).

3 Demographic and Land Use Planning Information

3.1 Population Projections

Growth projections for population for the entire Tamworth Regional Council Local Government Area (LGA) are shown in Table 3-1. These projections were compiled by forecast.id and are from 2016 to 2041, which is Council's current planning horizon. The estimated population in January 1996 (i.e. year 1995/96) is also provided. Note that as the population projections are for the entire LGA, they also include the populations in villages and rural areas that are not connected to the sewerage system.

3.3 Land Use Information

This DSP document should be read in conjunction with the Tamworth Regional Local Environmental Plan (LEP) 2010.

4 Sewerage Infrastructure

TRC operates and maintains four sewerage schemes. The villages of Attunga, Moonbi, Bendemeer and Nundle do not have reticulated sewerage schemes.

Barraba

The sewerage scheme at Barraba consists of five pumping stations and one sewage treatment plant (STP) which is located at the south eastern corner of the town. There are approximately 20 km of gravity mains and 1.2 km of rising mains within the system.

Manilla

The Manilla sewerage scheme has three pumping stations that discharge to the Manilla STP to the south west of the town. The reticulation system consists of approximately 29 km of gravity mains and 1.4 km of rising mains.

Kootingal

The sewerage scheme at Kootingal consists of 16.8 km of gravity mains, 3.3 km of rising mains, three pumping stations and an STP. The STP is located to the east of town.

Tamworth

The Tamworth City sewerage scheme is the largest within the TRC area. It consists of an STP located at Westdale, 14 pumping stations, approximately 385 km of gravity mains and 12 km of rising mains.

There are two major subsystems, divided by the Peel River. The area to the north east of the Peel River is referred to as the Swan Street subsystem, and the area to the south west of the Peel River is referred to as the Westdale WWTP subsystem.

The Swan Street subsystem consists of seven SPSs that contribute to the Swan Street SPS. Flows from the Swan Street SPS are pumped directly to the Westdale STP inlet works via a 600 mm diameter rising main.

The Westdale subsystem consists of seven Council owned SPSs which transport flows to the Westdale STP inlet pump station via several large diameter carrier mains.

The Arcadia, Hills Plain and Hills Plain Pressure Sewer service areas will discharge into the Tamworth sewerage scheme and the Westdale STP.

4.1 Existing Capital Costs

The estimated MEERA capital cost of sewerage capital works (including backlog works) servicing the areas covered by this DSP document are shown in Section 14. Note that only those assets constructed in the last 30 years are included in the capital charge calculation.

4.2 Future Capital Works Program

The timing and expenditure for sewerage capital works (including backlog works) servicing the area covered by this DSP document are shown in section 15.

4.3 Reticulation Works

The developer shall be responsible for the full cost of the design and construction of sewerage reticulation works within subdivisions.

5 Levels of Service

System design and operation are based on providing the following levels of service (LOS). Typical levels of service are outlined below. Further information on levels of service is available from:

- TRC's Water Supply and Sewerage Strategic Business Plan (Hunter Water Australia, 2010);
- NSW Water and Sewerage Strategic Business Planning Guidelines, NSW Office of Water, July 2011, (available at www.water.nsw.gov.au).

Community consultation was undertaken on the current levels of service during the preparation of TRC's Strategic Business Plan for Sewerage Services in 2010, in order to negotiate an appropriate balance between LOS and the resulting TRB.

The LOS that apply to TRC's sewerage schemes are the targets that Council aims to meet. They are not intended as a formal customer contract. Council's current LOS for sewerage are outlined in Table 5-1.

6 Design Parameters

Investigation and design of sewerage system components is based primarily on:

- Water Services Association of Australia “Gravity Sewerage Code of Australia WSA 02-2014 Version 3.1”
- Water Services Association of Australia “Sewerage Pumping Code of Australia WSA 04-2005 Version 2.1”

7 Developer Charges Calculation

7.1 Summary

The developer charges for the area covered by this DSP document area are summarised in Table 7-1. These amounts have been calculated on the basis of the information presented in the following sections (Sections 7.2 to 7.7).

Table 7-1 Summary of Proposed Sewerage Developer Charges

DSP Area	Capital Charge (\$ per ET)	Reduction Amount (\$ per ET)	Calculated Maximum Developer Charge (\$ per ET)	Adopted Developer Charge (\$ per ET)
Arcadia	11,108	4,568	6,001	6,001

7.2 Service Areas

The sewerage service areas and the basis of determining the service areas are summarised in Table 7-2.

Table 7-2 Basis of Determining Service Areas

Service Area	Basis of Determining the Service Area
Arcadia	New development area over 500 lots
Barraba	Separate small towns or villages
Hills Plain	New development area over 500 lots
Hills Plain Pressure	An area using alternative technologies (pressure sewerage system)
Kootingal	Separate small towns or villages
Manilla	Separate small towns or villages
Tamworth	Area serviced by a separate sewage treatment works

7.3 Equivalent Tenements (ETs)

All new properties and properties with change in use which are subject to payment of sewerage charges are liable for payment of developer charges. An ET is the basic unit to determine the loading that the development will place on the sewerage system. One ET represents the equivalent loading from a single, detached residential dwelling. TRC uses the NSW Water Directorate's Guidelines for Determining Water ET Figures.

Credit for existing use is applied in the calculation of the ET loadings, as the developer charges are levied for additional ET loading only. For example, the first lot in a residential subdivision is exempt from developer

charges where the lot is already connected to the sewerage system. Properties not already rated for sewerage do not receive the one lot credit.

ET projections for each service area are shown in Table 7-3. The ETs in January 1996 are also provided.

ET calculation details for each service area are shown in Section 13.

7.4 Capital Charge

The capital charge for each service area covered by this DSP document has been calculated using the NPV spreadsheet method.

Under the NPV spreadsheet method, the capital cost of relevant assets and projected ETs served in a service area are entered into a spreadsheet. These capital costs are only for the share of the asset capacity used in the service area. The PV of capital cost and the PV of new ETs are calculated, and the capital charge per ET is the PV of the capital cost divided by the PV of the ETs. A 3% discount rate was applied for pre-1996 infrastructure and a 5% discount rate was applied to post 1996 and future assets, in accordance with the DPI guidelines.

Calculation details for PV of ETs and PV of capital costs for each service area are shown in Section 16. The summary of the capital charge calculations is shown in Table 7-4.

Table 7-4 Capital Charge Calculation for Sewerage

7.5 DSP Area

Table 7-5 shows the agglomeration of service areas into DSP areas of within 30% of the highest capital charge. The Kootingal and Hills Plain service areas are agglomerated into a single DSP area, and the Arcadia, Hills Plain Pressure and Manilla service areas are agglomerated into a single DSP area. There is no agglomeration of capital charges for the Barraba and Tamworth service areas.

7.6 Reduction Amount

TRC has adopted the NPV of Annual Bills method to calculate the Reduction Amount. This method involves calculation of the PV of the future net income, which is the difference between the revenue from annual bills, and annual OMA cost, projected for new development over the next 30 years. This is divided by the PV of the new ETs over 30 years to give the reduction amount. TRC has a single tariff structure for all towns and villages. The reduction amount calculations are shown in Table 7-7. The annual bill and OMA cost were obtained from the 2015/16 TBL Water Supply Performance Report as this was the most recent available data at the time of preparation of the DSP.

Table 7-7 Calculation of the Reduction Amount

Sewerage annual bill = \$777 per ET

Sewerage OMA Cost = \$398 per ET

Net income = Annual bill – OMA cost = \$379 per ET

7.7 Cross-Subsidy

The cross-subsidy is the difference (%) between the annual bill with the calculated maximum developer charge and the proposed lower developer charge.

LWUs may elect to cap the developer charges for small villages in order to maintain affordability and to avoid 'stranded' assets in such villages. LWUs may also cap other developer charges to maintain affordability, subject to adopting a commercial developer charge which recovers a significant proportion of the capital cost of the infrastructure. TRC has decided to apply a cross subsidy to reduce the developer charges in the small towns and villages to \$500 so that development is not impeded in the small towns and villages by higher developer charges. TRC has also decided to apply a cross subsidy to reduce the developer charges in Hills Plain. The developer charge in the gravity sewer area of Hills Plain will be reduced to 31% of the maximum developer charge and the developer charge in the pressure sewer area of Hills Plain will be reduced to 34% of the maximum developer charge. Tamworth and Arcadia developer charges will be set at the maximum developer charge.

The cross-subsidy, resulting from capping of developer charges must be disclosed in the DSP, the utility's Annual Report, Annual Operational Plan and in communication materials for consultation with stakeholders as noted above.

Two options were developed and examined as follows:

Option 1 – No cross subsidy – Calculated maximum developer charge

Option 2 – Cross subsidy - to reduce small towns and village charges to be equal to \$500, and to reduce Hills Plain charges to 31% and 34% of the maximum developer charge for the gravity and pressure sewer areas respectively – adopted.

A summary of the developer charges option and cross-subsidy is shown in Table 7-8.

8 Reviewing/ Updating of Developer Charges

Developer charges will be adjusted on 1 July each year on the basis of movements in the CPI for Sydney, in the preceding 12 months to December, excluding the impact of GST.

Developer charges will be reviewed by Council after a period of 4 to 8 years.
