

Present

David McMurray – Tamworth Baseball – President

Blake Mammarella- TRC- Sport and Recreation Development Officer

Adam Jones – TRC – Outdoor/Sports Precinct Supervisor

Apologies

Discussion topics

TRC

Blake

- Thanked David for sending through an updated list of Baseball's storage needs. Blake highlighted the fact that it would be ideal to allow Baseball to store all equipment on site rather than off site. The list will be evaluated and a decision made as to whether Council can store their equipment elsewhere to 'free up' space.
- Touched on strategic planning for the association. Blake would like to sit down with David and other board members in the future to develop a strategic plan to allow Baseball to make sound decisions around grant applications and project plans. Blake explained that if board members moved on, this plan would allow new members to understand the mission and vision of the association.

Baseball

David

- Spoke about the fact that first base on FOD1 is continuously damp. Asked if it could be compacted and further dry soil put on it?
- Gave an update on the application being made for the Infrastructure Grant. The intended project is an upgrade to the batter's practice cages.
- Asked if FOD1/2 can be aerated? Adam said he could include it into the Riverside schedule.
- Asked if there was any opportunity to have netting on FOD1/2 to be fixed or replaced. A number of smaller holes have developed. Adam did source quotes for this; however, they came back higher than expected. Adam mentioned there was a possibility of adding this to the asset renewal schedule. The net could be fixed periodically in parts over time.

Actions

TRC

Blake

- Email David and other board members to organise a time to develop strategic plan.
- Contact project officers to see if netting can be added to asset renewal plan.
- Work with Adam to determine space needed to store Baseball equipment. Take this to Sport & Recreation manager.

Meeting, July 2021 – Sports Operational Meeting – Baseball – 13th July 2021

Adam

- Have 1st base on FOD1 compacted and further soil added.
- Include FOD1/2 within the Riverside aerate schedule to help alleviate some damp soil.

Next Meeting

10th August 2021
